Powerful Backoffice Reporting

4G/GPS Act 55 Smart Health Solution

Comprehensive Senior Health, Wellness and Safety Solutions
For Seniors, Family, Care and Practitioner Providers.

Big Screen, Easy Interaction

The wearable features an easy to use large, 3D touch screen. The 1.5" screen is high resolution with bright colors and crisp display, easy to use, even in glaring light.

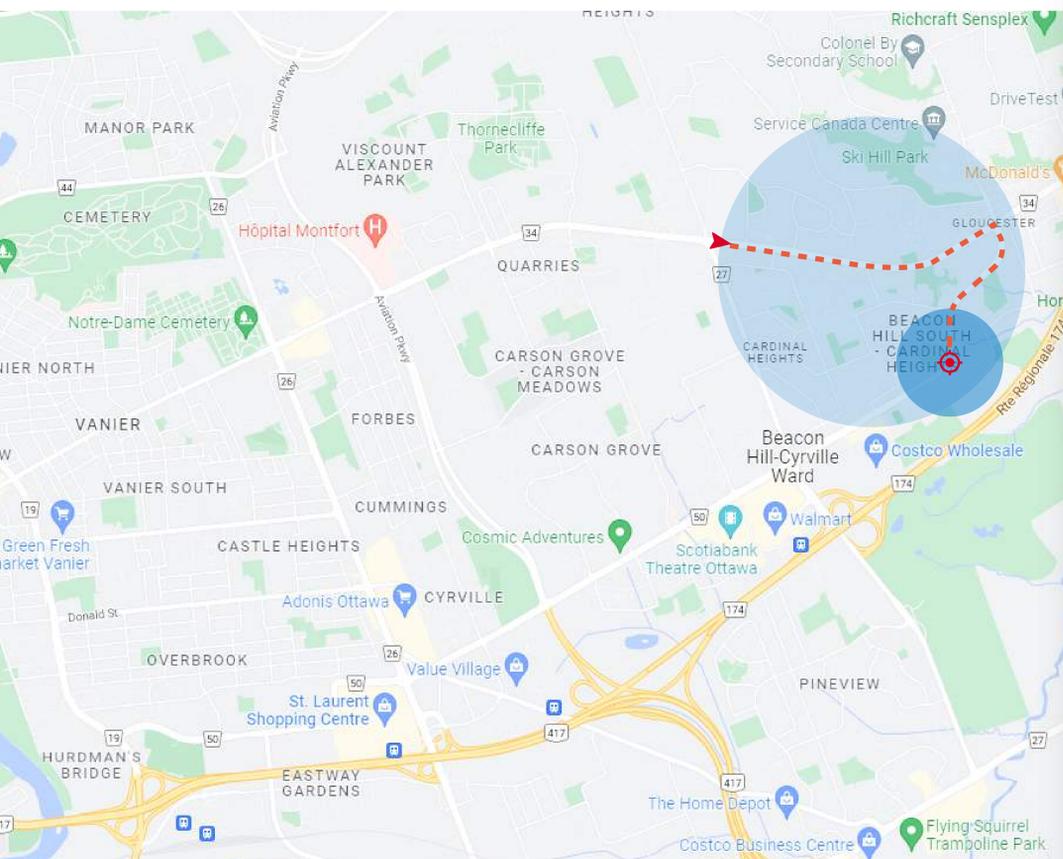

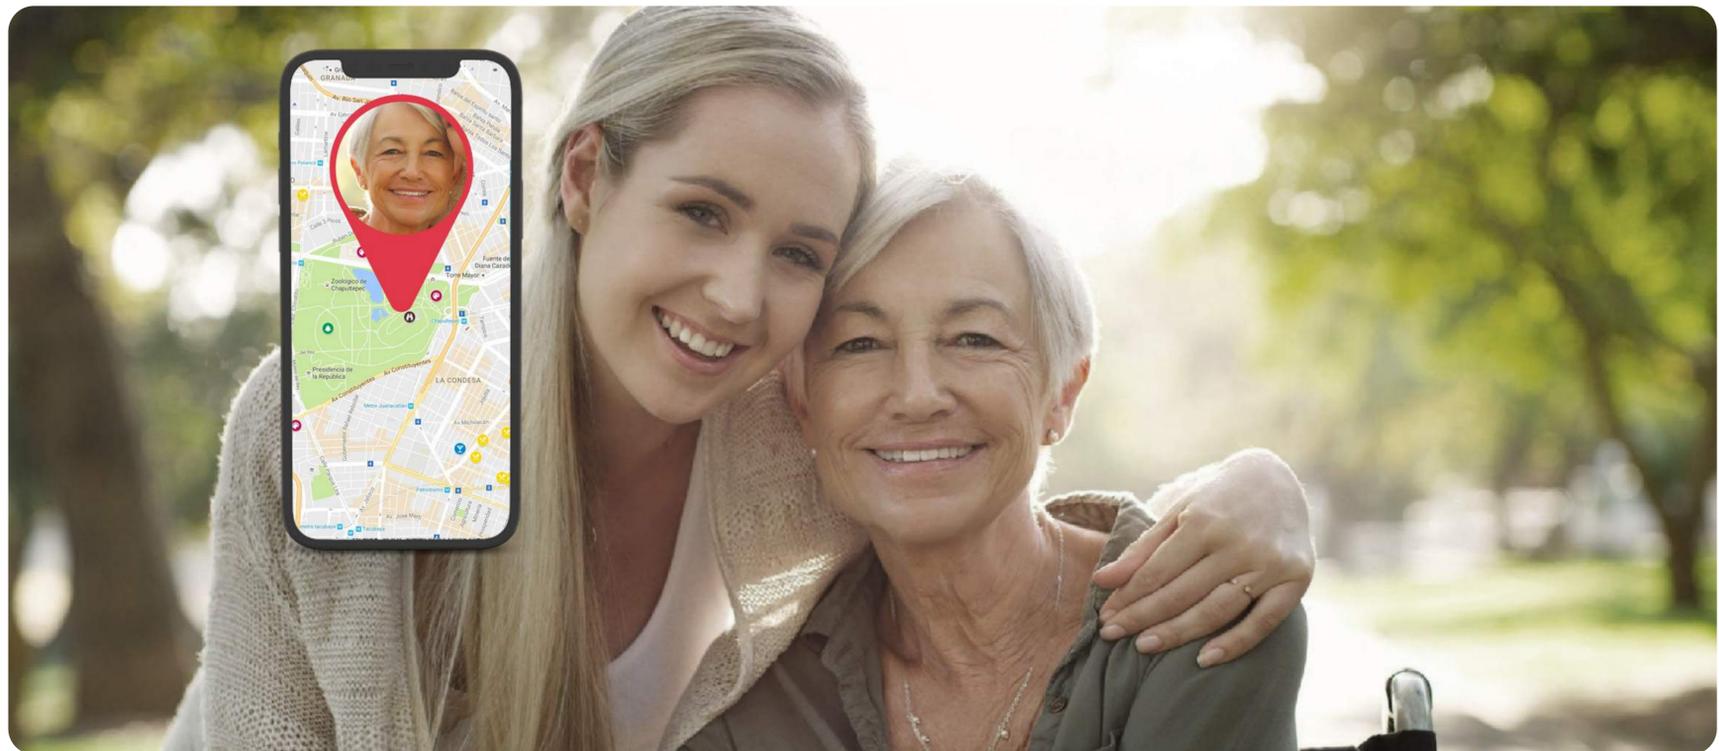

Act Adults 55 Plus-oriented Interface Design

With big and easy to read icons and fonts, large keys and full screen touch operation screen, it is simple and easy to use.

More Accurate Positioning, More Relieved Care Set up A Geofence, Ensure Seniors' Safety

With dual satellite GPS system, a loved one's location can be checked anytime and anywhere. By using Ingeni Health App, you can enable the function of Geofence, mark safe zones, and receive a warning if the individual is leaving the secure area.

Always Stay Connected with Loved ones

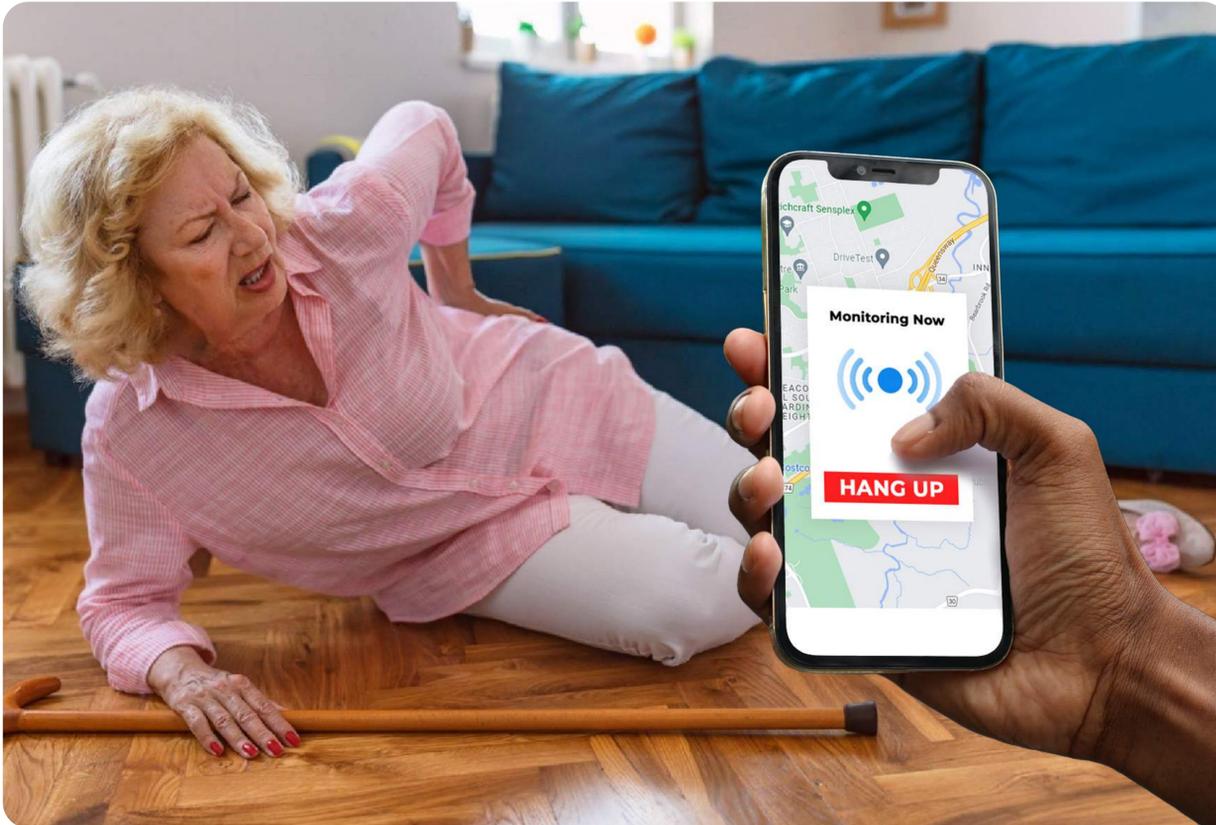

With our intelligent and dynamic GPS tracking, the device can track a route and location anytime and any where, constantly adjust route to quickly navigate and find an individual.

A GPS tracker allows caregivers to keep an eye on their loved ones when they're out and about, helping to ensure their safety.

Remote Sound Listening Timely Rescue for Emergency

When the remote guarding function is enabled, the caregiver can hear the sound around the Health Wearable via the Ingeni Health App, and gain realtime information on the state of your loved one and the surrounding environment.

One-button Emergency Contact Calling

Equipped with one-button emergency contact calling, the device makes it easy for seniors to press the SOS emergency contact button on the broadside of the Health Wearable to call for help when they are in an emergency situation.

You can designate a number of your neighbour, or property management officer, or a nearby relative as your emergency contact for quick rescue.

**2-Way Voice calling contacts
and converse in real time.**

The Health Wearable is not a medical device. The results and suggestions are for reference only.

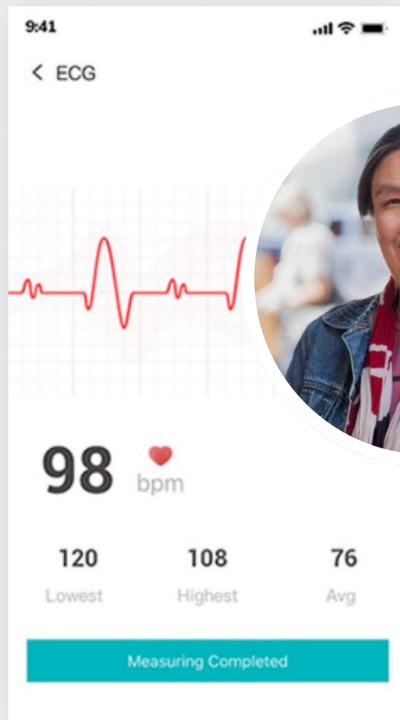

Beautiful Sound, Easy Communication

The Ingeni wearable professional BOX sound cavity design amplifies volume for a better sound clarity and quality, especially in an open air environment.

Only Connect with Those You Trust

With the Ingeni Health App, the caregiver can register trusted contacts for calling or texting. Only those predesignated contacts can call or text the wearer, eliminating the worry of fraudulent callers.

Intelligent ECG Monitoring Good care for the Loved one's Heart Health

With the Ingeni Health App, the device is capable of generating an ECG similar to a single-lead electrocardiogram, which can detect an abnormal heart rate, including Artrial Fibrillation (AF) and more.

All Day SpO2 Monitoring

With a revolutionary new Blood O₂ sensor, the device accurately monitors the loved one's SpO₂. If SpO₂ level is lower than 90%, please make the decision to supplement oxygen as soon as possible to reduce the incidence of cardiovascular and cerebrovascular diseases.

24/7 Heart Rate Monitoring Prevention of Heart Diseases

This smart Health Wearable can accurately monitor a loved one's heart rate in real-time during the day or even while sleeping. If the Act Adults 55 Plus's heart rate is abnormally elevated, the caregiver will receive a real-time early-warning via the Ingeni App.

A Comprehensive Blood Pressure Solution

The Ingen Health wearable monitors your blood pressure 6 times daily providing results and history charts on our app. For FDA approved accuracy, easily calibrate your wearable with our cuff-type blood pressure monitor.

Resting Heart Rate

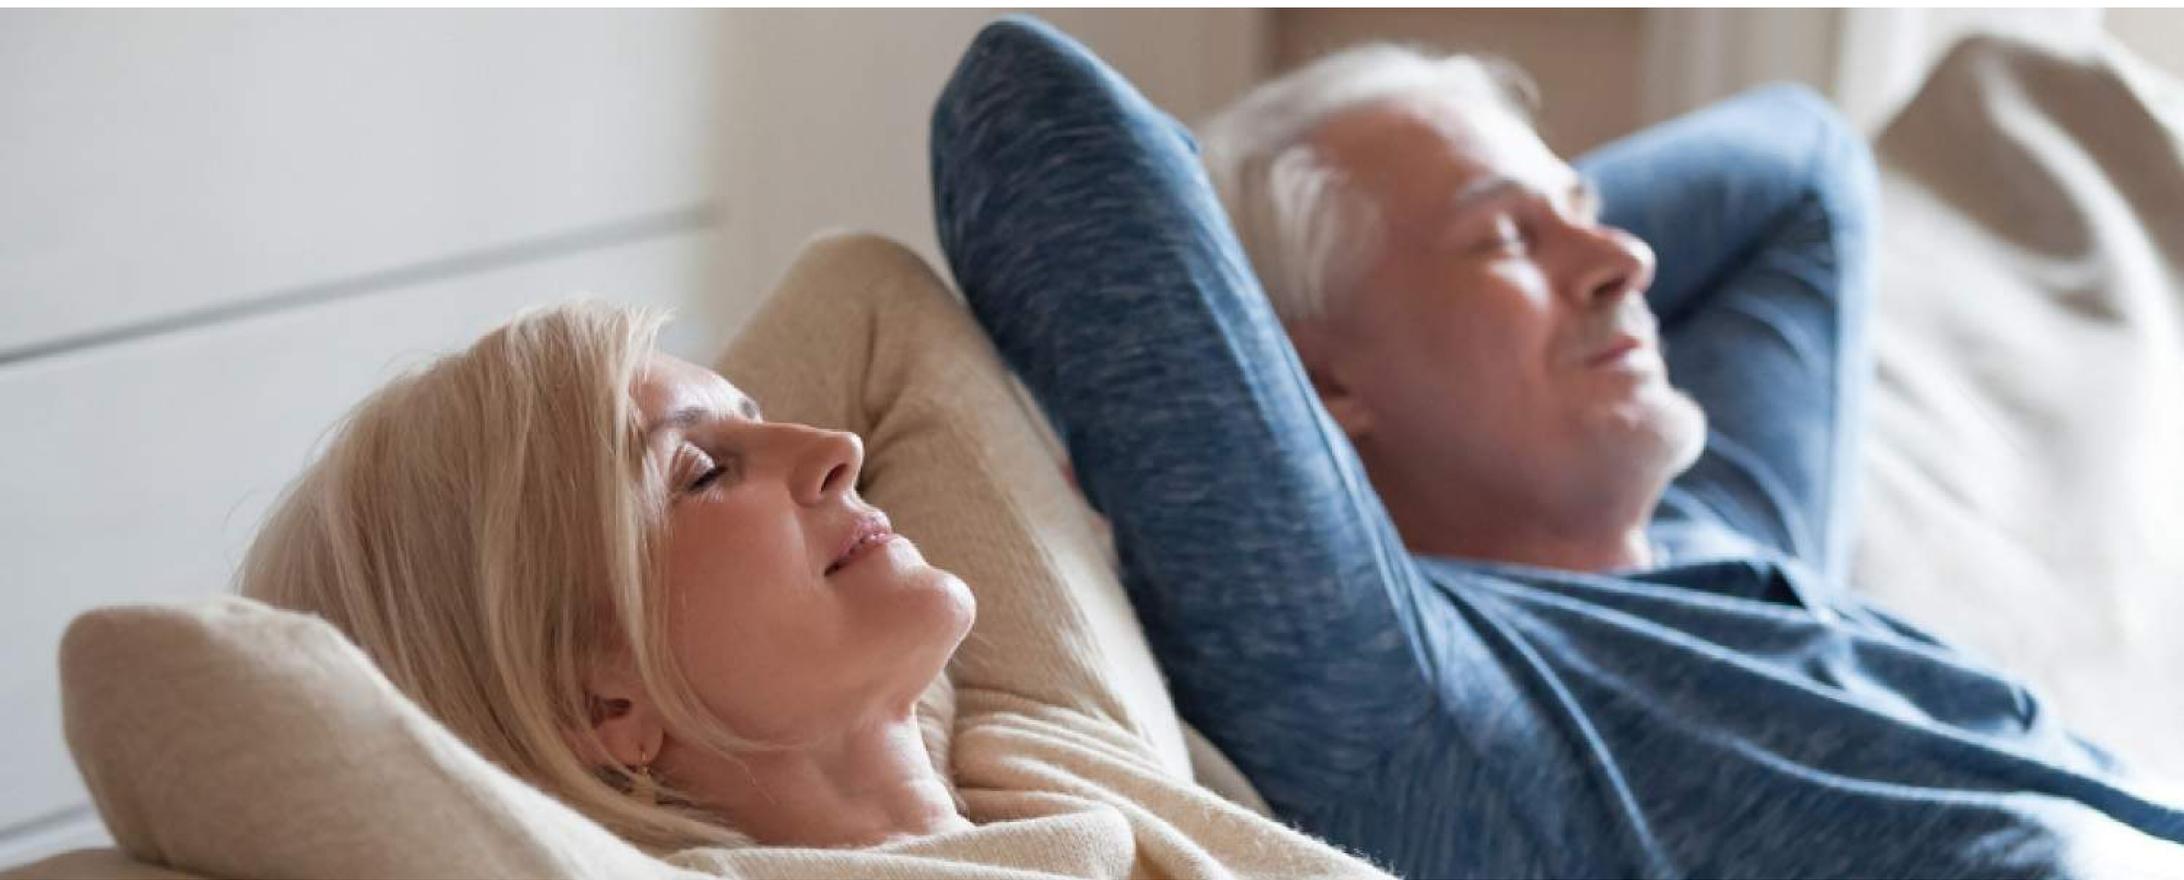

Having a lower resting heart rate is beneficial to your heart health. There are a number of factors that can influence your heart rate, including body size, emotional state, activity level and environmental temperature. Your resting heart rate refers to how fast your heart contracts to pump blood to your organs and tissues.

- 10,000 Steps Increase Active
- Benefits of a Good Night Sleep
- Benefits of Lower Stress

Smart Sleep Monitoring Your Sleep Automatically

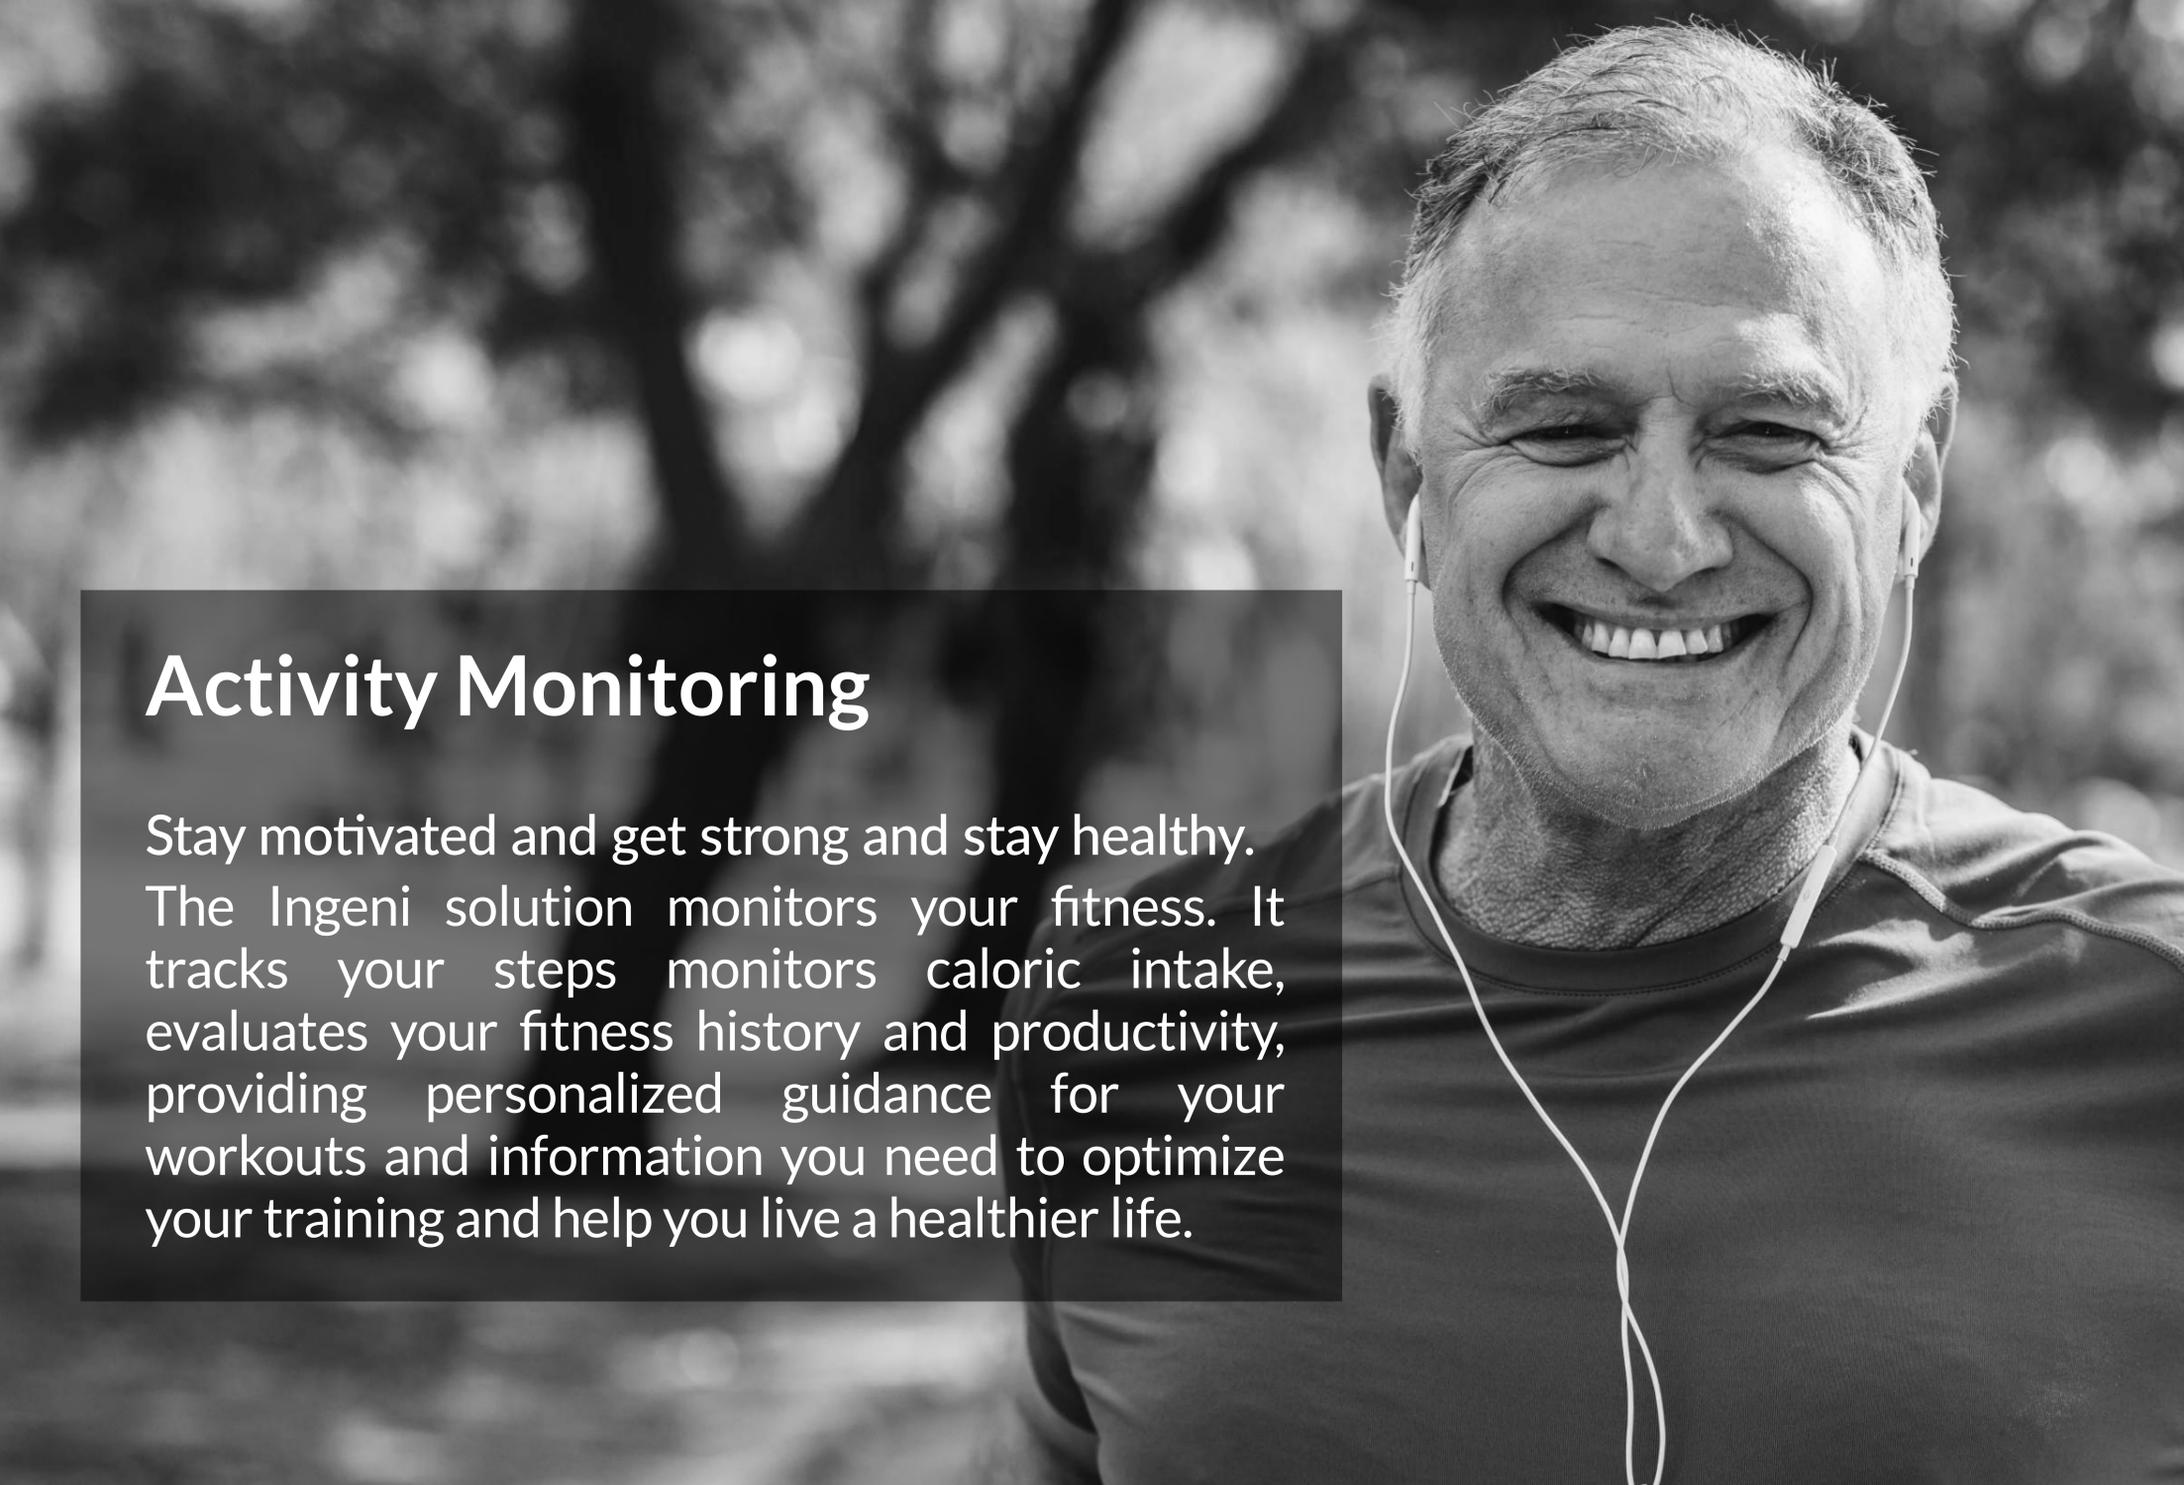

A good sleep is integral for your mental and physical health. While you are sleeping, our device sensors are monitoring your sleep stages, and sleep quantity and quality. We provide you with a daily sleep score that allows you to learn your sleep patterns and how to improve your quality of sleep.

Manage Your Stress

The ingeni wearable uses HRV data and monitoring to produce an individual's stress score and provides the coping mechanisms that can initiate positive behavioral changes such as eating better, being more active and improved sleep to lower stress levels.

Activity Monitoring

Stay motivated and get strong and stay healthy. The Ingeni solution monitors your fitness. It tracks your steps monitors caloric intake, evaluates your fitness history and productivity, providing personalized guidance for your workouts and information you need to optimize your training and help you live a healthier life.

Be Active

Being active is a great way to maintain a healthy body!

Ride a bike, take a yoga class, or just simply walk!

It doesn't have to be complicated just walking can bring you many health benefits.

10,000 steps a day can help you maintain a healthy body, and lose weight, improve circulation, prevent cardiovascular disease, prevent diabetes, improve sleep, better digestion, maintain joints and strengthen bones, decrease stress and improve over all well being.

Better Health Reminder

Simply swipe up from the home screen to set your customized alarm, including wake up alarm, appointment prompt, medicine reminder and meal time reminder.

Waterproof IP67 Convenient to Use

The Ingeni wearable is water proof with the ability to protect against liquids, including drips, sprays and moisture. You can confidently wear your wearable washing hands, taking a shower or walking on a rainy day.

Washing hands and face, or rain splash will not affect normal use.

Please dry the device after getting wet.

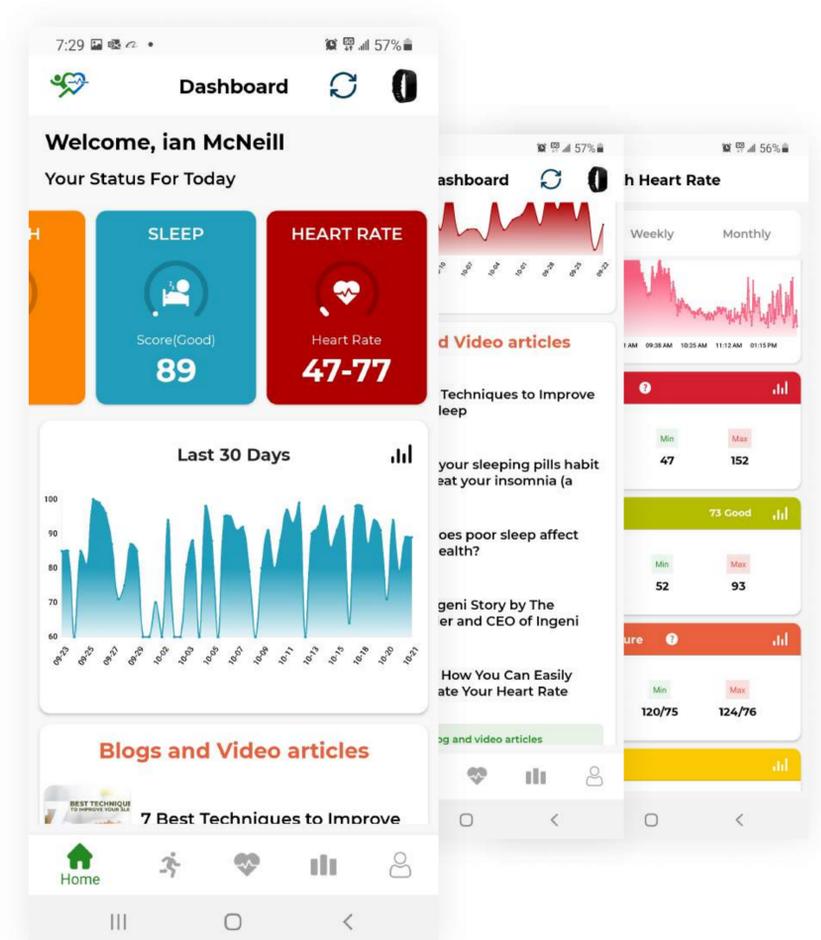

Magnetic Charging Cable, Utterly Effortless Charging

With the magnetic charging cable, it is simpler for seniors to refill the 580mAh built-in battery. It's very forgiving, requiring no precise alignment. Simply hold the connector near the back of the Health Wearable where the magnets cause it to snap into place automatically.

Ingeni Health App Remote Care & Peace of Mind at Your Finger Tips

You can use the Ingeni wearable health and safety functions for remote health monitoring, GPS location, fall detection and care setting voice reminders to keep abreast of your loved one's health and wellness.
